

Take CPT of the universe, and Einstein's equations come back

The metric is a fixed background throughout. The gravitational field is not quantised at any step.

A fold supplies

a horizon temperature
an area law, from entanglement
horizons through every point

Jacobson's argument gives

the Einstein equation
 $G > 0$, four dimensions
 Λ an integration constant

Falsification

a neutrino line at 245.8 PeV
one neutrino above it
refutes the model
