

Take CPT of the universe, and Einstein's equations come back

DERIVED **Nineteen properties of general relativity out, four in**
Jacobson's 1995 argument assumed three of them; the fold supplies all three

what the fold hands over
a horizon temperature
an area law, from entanglement

what comes back
the Einstein equation
 $G > 0$, four dimensions, Λ an integration constant

one neutrino above 245.8 PeV ends it

TESTABLE NOW

Every number in the paper is produced by a script and checked against it.
