made during reheating
made in the radiation era
10^3
10^2
10^1
N_1 mass M (PeV)
10^{13}
10^{14}
reheating temperature $T_{\rm rh}$ (GeV)
quadratic minimum, with graviton exchange
quadratic minimum, expansion alone
quadratic, sudden end of reheating
quadratic, with the Einstein-Cartan term
quartic minimum, with graviton exchange
quartic, with the Einstein-Cartan term
between quadratic and quartic minima
